

до себе. Адже, використовуючи різноманітні ГДЗ, копіювання текстів та інше, дитина таким чином визнає свою неспроможність виконати завдання.

У висновку хотілось вказати на те, що рівень академічної доброчесності у закладах освіти безпосередньо або опосередковано впливає на знецінення дипломів вишів та невизнання їх за кордоном, гальмування економіки, розвиток наукових розробок та впровадження їх у виробництво, зниження якості медичного обслуговування тощо. Загалом, не дотримання принципів академічної доброчесності призводить до зниження рівня знань усіх здобувачів освіти і, як наслідок, до зниження авторитету країни у світі.

### **FORMATION OF ACADEMIC INTEGRITY SKILLS IN THE EDUCATIONAL PROCESS (EXAMPLE OF UKRAINE)**

Academic integrity is an essential aspect of the educational process, promoting honesty, trust, and ethical behavior among students. There has been a notable surge in articles addressing this matter, with the majority focusing on the issue of academic integrity in Europe and America. However, in Ukraine, this topic has yet to gain significant attention [1].

Certainly, in Ukraine, the development of academic integrity skills has become a significant focus within the education system. In recent times, Ukraine has made notable progress in establishing a solid framework to support the integration of quality assurance measures in its higher education system: the Law of Ukraine “On Education” (2017), the Law of Ukraine “On Higher Education” (2014), the Law of Ukraine “On Copyright and Related Rights” (2015), the National Strategy for the Development of Education in Ukraine for a period up to 2021 have been adopted.

Academic integrity encompasses a set of values and principles, including honesty, fairness, and respect for intellectual property. It involves acknowledging the contributions of others, giving credit where it is due, and maintaining high ethical standards in scholarly work. To foster academic integrity, educational institutions in Ukraine are integrating it into the curriculum. They emphasize the importance of citing sources, referencing, and avoiding plagiarism. By introducing these concepts early on, students develop an understanding of academic honesty and its implications. To create a culture of academic integrity, educational institutions in Ukraine

are organizing awareness campaigns and programs. These initiatives educate students about the importance of ethical behavior, proper citation practices, and consequences of academic misconduct. Workshops, seminars, and guest lectures by experts further enhance students' understanding of academic integrity.

In recent years, there has been a prominent company dedicated to fostering and enhancing critical thinking abilities and research skills. To foster academic integrity, educational institutions in Ukraine emphasize the development of critical thinking and research skills. By teaching students how to analyze information, evaluate sources, and synthesize knowledge, they empower them to produce original and well-researched work. These skills reduce the likelihood of academic misconduct.

We should emphasize on the role of Educators and Academic staff: educators and academic staff in Ukraine play a vital role in shaping students' understanding of academic integrity. By leading by example, displaying ethical behavior, and providing guidance, they instill the importance of integrity in students. Educators also dedicate time to discuss academic integrity, clarify doubts, and address ethical concerns.

Educational institutions in Ukraine foster a collaborative environment that encourages students to seek help and support. Peer tutoring programs, writing centers, and mentoring initiatives provide resources for students to enhance their academic skills and integrity. These support structures offer guidance on proper citation, effective writing techniques, and research methodologies. The formation of academic integrity skills in the educational process is crucial for maintaining high ethical standards and promoting scholarly integrity in Ukraine. By integrating academic integrity into the curriculum, raising awareness, strengthening policies, utilizing technology, and nurturing critical thinking, Ukrainian educational institutions are equipping students with the necessary skills to uphold academic honesty. The collective efforts of educators, students, and institutions contribute to fostering a culture of integrity and excellence in education.

In recent years, plagiarism detection has become a standard practice for evaluating student research papers across all academic levels. Additionally, journal articles are also subjected to thorough plagiarism checks. It is our aspiration that Ukrainians will develop the ability to produce high-quality work without resorting to plagiarism in the near future.
