

## IDEA, CONTENT AND IMPLEMENTATION PATH OF ONLINE EDUCATION IN THE CONTEXT OF EPIDEMIC SITUATION

Since 2020, the epidemic situation of new coronavirus has rapidly swept the world, this major epidemic has also made online education appearance from the 66 background, becoming an important form of education during the epidemic. Therefore, it has great value and practical significance to discuss the idea, content and implementation path of online education in the context of epidemic situation.

This study focuses on the idea of online education in the context of the epidemic situation, directly faces the life crisis in the new coronavirus epidemic situation, and clarifies that the pursuit of online education is not only to achieve knowledge transfer across time and space, but also to assume the function of educating people, that is, to improve the quality and value of life as the purpose, laying a foundation for the growth of individuals' lifelong life [1, 5]. In the process of online education, teachers need to guide learners to establish a life-long view of life education. Advocate to maintain life safety, improve life quality, and realize life value as the core of individual life growth. We should uphold the open concept of life education. The epidemic situation has triggered a change in the way of learning. We should make full use of all educational resources and educational technologies to provide students with a flexible and open learning environment, and build an open pattern in which schools, families and society fully participate in life education [2, 3].

This study emphasizes that in the context of epidemic situation, online education needs to complete survival education, disaster education and death education while transferring subject knowledge [4]. This study provides the implementation path of online education in the context of the epidemic situation. It is suggested that schools should take the lead and implement the idea of life education, Promote students' growth; On the basis of families, families and schools work together to carry out life education to face the changes in living conditions, education models and learning styles; At the same time, give full play to the advantages of online education. While integrating excellent educational resources, create a good educational environment with the help of various educational platforms, and carry out life education cooperatively by sharing resources and building a life education practice platform [5].
